ARCHITECTURAL SURFACING

DOOR SOLUTIONS

THE PROBLEM

← Wrong color

← Dirty, beat up

← Broken laminate

Old doors...destined for the landfill.

WHAT ARE YOUR OPTIONS FOR EXISTING DOORS?

Paint

- Definitely the cheapest option, but is it the best looking?

Laminate

- Door needs to be removed
- Bad smell
- Very disruptive
- Takes about 4 hours
- Won't work on metal doors

Strip, Stain, Varnish

- Bad smell
- Very disruptive
- Mixed results: can look smudgy and uneven
- Can take up to 3 days
- Won't work on metal doors

New Doors

- Remove old doors, place in dumpster, put in landfill
- Install new doors made from cut-down trees
- Stain and varnish
- New hardware needed

Surfacequest Solution

SURFACEQUEST SOLUTION

**Transformed
to brand new
looking door
in 30 minutes**

- Walnut
- Mahogany
- Cherry
- Maple
- Bamboo
- and more

Door stays in place
Takes 30-60 minutes

Minimal disruption
No smell

Extra-wide door

Metal door

Wood door
